Soul features advanced safety systems designed to help give you peace of mind every time you drive. Each one is engineered to help you maintain control, even in harsh road conditions and in some emergency situations.† These safety systems are designed to function automatically, leaving you free to focus on safe driving.

# VEHICLE STABILITY MANAGEMENT (VSM)

VSM adds steering-directioncontrol capability. It intervenes when appropriate to help the driver regain control of the vehicle.

# **ELECTRONIC STABILITY CONTROL (ESC)**

ESC provides improved directional stability, which helps you maintain better control in difficult driving situations. During emergency maneuvers, it can control the engine and brakes to help keep your Soul on course.

# TRACTION CONTROL SYSTEM (TCS)

When TCS senses wheelspin during vehicle acceleration, it uses engine power and brake force to help transfer power to the wheels that have the most traction.

# ELECTRONIC BRAKE-FORCE DISTRIBUTION (EBD)

To help maintain more consistent braking as vehicle loads and weight distribution change, EBD adjusts the front-to-rear balance of brake pressure.

# **BRAKE ASSIST SYSTEM (BAS)**

If BAS detects emergency braking, based on how quickly you step on the brake pedal, it instantly applies full braking force, which helps shorten your overall stopping distance.

# HILL-START ASSIST CONTROL (HAC)

To help keep your Soul from rolling backward when starting off on a steep hill, the HAC automatically holds the brake pressure for two seconds after you take your foot off the brake pedal.

tho system, no matter how advanced, can compensate for all driver errors, driving conditions, accidents, and/or injury. Always drive responsibly. 16 See Specifications page for endnote. + (plus) WITH DESIGNER PACKAGE SHOWN.

# Strength

All doors are reinforced with steel beams to help absorb impact energy and deflect side-impact force. The A and B pillars are also reinforced to help strengthen the body of the vehicle.

# FRONT & REAR CRUMPLE ZONES

Front and rear crumple zones are specially engineered to help absorb and dissipate energy generated at impact, helping to preserve the structural integrity of the passenger compartment in certain collisions.

# REAR CHILD-SAFETY DOOR LOCKS

Rear child-safety door locks are designed to help prevent the doors from being opened accidentally, which is especially important when small children are passengers. With the doors in the locked position, they can only be opened from the outside.

# LATCH SYSTEM

Soul features easy-to-use
Lower Anchors and Tethers for
Children (LATCH) system. It is
engineered to let you securely
install a compatible child seat at
either end of the rear seat.

# AIRBAG & SEAT-BELT SENSORS

This advanced system monitors the severity of certain impacts, the presence of a front passenger and seat-belt use, and then controls airbag inflation accordingly.<sup>17</sup>

# FRONT SEAT-BELT PRETENSIONERS

Pretensioners have been designed to tighten the front seat belts in the event of certain collisions. This helps to reduce the likelihood of injuries in some situations.

# HEIGHT-ADJUSTABLE SEAT-BELT ANCHORS

Intelligence

The front height-adjustable seat-belt anchors allow the driver and front-passenger seat belts to be raised and lowered for a proper fit.

# FRONT AND REAR THREE-POINT SEAT BELTS
